Lab 4 worksheet: is your main content in the raw page?

Test 1, view source. Chrome: Ctrl+U (Cmd+Option+U on a Mac). Ctrl+F for: the main heading, the first paragraph, one price, one sentence lower down.

Test 2, JavaScript off. F12, then Ctrl+Shift+P (Cmd+Shift+P), type javascript, Disable JavaScript, reload. Open every tab and accordion. Close DevTools to undo.

Pass: text found in the source and the page still reads as a page. **Fail:** blank, a spinner, or only header and footer. Our rule: 200 characters of body text or more.

#	Page	Address	Heading in source?	First paragraph?	Price?	Lower section?	JS off: pass or fail, and what was missing
1	Home page						
2	Main service or product page						
3	Pricing or plans						
4	One blog post or guide						
5	A page-builder or plugin page						

Template or builder each failing page uses: _____ Who fixes it: _____ By: _____

Your number: _____ of 5 pages pass both tests. Date tested: _____ Re-tested after the fix: _____
